PERSONAL PROJECTS

Quiz App

- Developed a comprehensive quiz application featuring user authentication, enabling users to create, share, and manage quizzes effortlessly.
- Implemented a dashboard providing users with insightful analytics, including total quizzes, question counts, and impressions, enhancing user engagement and decision-making.
- Designed an analytics page allowing users to analyze question-and-answer and poll-type questions, facilitating data-driven insights and informed content creation strategies.
- Enhanced user experience by incorporating features such as quiz sharing, deletion options, and detailed question-wise analysis, demonstrating a user-centric approach to application development.

Twitter-Clone Full Stack App

- Built a full-stack Twitter clone app that allows users to create an account with log-in authentication, post tweets, and search tweets.
- Built this app using HTML, CSS and JavaScript with firebase platform.
- All the data of tweets and users are stored in Firebase Realtime Database.

Fullstack Job Finder App

- Spearheaded the development of a comprehensive Fullstack Job Finder application, catering to both recruiters and users, utilizing React.js, Express.js, and MongoDB
- Integrated advanced skill-based filters
- providing users with a comprehensive view of all posted job opportunities, fostering efficient job exploration
- Enabled recruiters to edit and update job posts seamlessly

Pocket Notes

- Conceptualized and developed a dynamic Pocket Notes app using React, CSS, and JavaScript
- Implemented a robust system allowing users to create and manage separate note groups, facilitating organized content
- Enabled users to create notes within each group, capturing the date and time of note creation for chronological reference.
- Leveraged React for building a responsive and interactive user interface.

Rock, Paper, Scissors Game

- Developed an interactive Rock, Paper, Scissors game using HTML, CSS, and JavaScript
- Implemented random computer choices to simulate dynamic and challenging gameplay.
- Implemented a score tracking system to keep a record of the user's performance against the computer.
